

... to the world of **Greenfield Composter®**!

**Eco-Industrial Management Ltd.** (Eco-IM)  
has under the trademark  
**Greenfield Composter®**  
developed composting systems that treat  
organic waste.

Companies and corporations that  
specialize in recovering waste such as  
cities and communes, golf course  
maintenance, farmers, fruit and vegetable  
growers, wine growers and others that  
depend on organic fertilizer have the

possibility to buy, rent or lease **composting reactors (accelerators)**

.

□

In collaboration with our partners we have the ability to enter into management agreements regarding the organic waste treatment system and the delivery *of* biogas energy production plants\* .

Eco-Industrial Management Ltd.'s aim is to convert organic waste in

an environmentally sustainable way, into premium quality **Greenfield Compost®**

, within the shortest timeframe and at less cost.

The operator profits twofold of the **Greenfield Composters®** through the receipt of organic waste and its professional disposal as well as through the sale of high valued **Greenfield Compost®**

. The compost produced in

accordance with the  
EU-directive and supplied with  
a quality certificate, ensures  
highly demanded products.
